COR=0701 Staff Mtg. 8 Dec 59

15 Dec a meeting to be held with Dr. York to review CORONA, SAMOS AND MIDAS. RMB summarized the thinking of Dr. Billings to effect that drastic major cuts shld be made in ground handling equipment at this time. Reasoning that this is an R&D phase insofar as vehicles are concerned and until w we actually have the product of the flt in hand we do not know what intel data we will get. Greatest effort on the read-out equipment shld take place when the vehicle becomes opnl not durin R&D since cost is tremendous.

NRO review(s) completed.
